Magnum Grow Habitat Nutrition is a powerful combination of effective plant and soil nutrients that will grow sweeter, bigger and more nutrient rich Food Plot forage. Use it when planting all types of food plot seed mixes. It will help to increase seed germination rate, balance soil PH and get your plot off to a quick and strong start. Apply it several times throughout the growing season to keep new tender shoot growth all season long.

Magnum Grow Habitat Nutrition has no bad odor! Don't be fooled into using other products that can actually keep wildlife away. Magnum Grow contains all natural, feed grade ingredients that are safe to use around people and animals. Humic Acid, Kelp, Molasses and other natural nutrients increase your food plots protein level, sugar and relative feed value (RFV). Deer, Turkey, Pheasant and other wildlife will grow bigger and healthier.

Magnum Grow is easy to use. Just mix with water, per label instructions, and spray it on Trees, Shrubs, berry bushes, saplings, native vegetation, food plots and even your garden. Magnum Grow works on all types of plants and soil, all climate zones and it is safe for the environment. Magnum Grow is serious Wildlife Habitat Nutrition!

Product Specifications

Nitrogen derived from Urea,
Potassium derived from sulfate of potash
Contains non plant food ingredients:

2.75% Humic and Fulvic Acids

Derived from Leonardite

2% Kelp (*ascophyllum nodosum*)

Purpose: To promote nutrient uptake by plants. Increase microbial activity in the soil, nitrogen efficiency, nutrient uptake by plant

Application Recommendations

(Product dilutes with water.)

Tank Mixing: Dilute product in tank sprayer at a rate of 20 gallons of water to 1 gallon of Magnum Grow. Apply 2.5 to 3 gallons of product per Acre. Product can be mixed stronger (up to 10 to 1). **THE PRODUCT SHOULD BE AGITATED PRIOR TO AND DURING APPLICATION.**

In Furrow Application: Dilute product at a minimum rate of 2 to 1. Product can be mixed stronger (up to 1 to 1) when applied directly into furrow.

Soil Application: Dilute product in a tank sprayer and apply evenly over planting area. Lightly disc into topsoil with seeds when planting.

Foliar Applications: Dilute product at tank mixing rate and coat foliage thoroughly 3-4 times per year. For new plants apply product when plants develop foliage and or are 6-10" inches tall.

Mixing with other chemicals:

Compatible with most pesticides and can be applied in existing spray programs. When using a chemical mixture that has not been used before, always try a small sample mix before application or check compatibility by doing a jar test.

Aerial Application: For aerial application, product can be mixed at a rate of 5 to 1.

Watering Application: Dilute product to a minimum of 200:1 or 2-3 oz per gallon of water. Water normally. Product is flowable and can be used in Pivot irrigation equipment.

Trees: Dilute at normal rate. Coat foliage and bark thoroughly 2-3 times per season. Distressed trees apply every 3-4 weeks and coat entire canopy.

Odor: Magnum Grow has no odor, animal or fish products. **BEST RESULTS WHEN TEMPERATURES ARE ABOVE 50.F.**

Contact your Harvest Grow representative with product application questions.

Storage and Handling

Do not expose to excessive heat or in direct sunlight. No special or hazardous material handling or storage required. Magnum Grow has a slightly acidic pH, but is neither corrosive or abrasive. Because Magnum Grow nutrients are held in a concentrated suspension, the product must not be exposed to freezing temperatures or stored above 110.F.

KEEP OUT OF REACH OF CHILDREN

If product comes in contact with skin or eyes, flush with water immediately and call a poison control or a doctor.
